BENNING PC-Win MM 11

Version: 2.2.2.0 for Windows® 98/ ME/ 2000/ XP/ Vista

Note:
1. If your system did not meet the minimum system requirement(s),
the installer will abort the setup.
2. Please close all running programs (including antivirus program)
and run disk defragmenter prior to starting the BENNING PC-Win MM 11
program.

The Software BENNING PC-Win MM 11 exists of the program BENNING PC-Win MM 11 "Online" and the program BENNING PC-Win MM 11 "Download".

The program BENNING PC-Win MM 11 "Online" keeps an account of a series of measurements that are measured with the Digital Multimeter BENNING MM 11 on a PC or Laptop. The software allows the recording of a series of measurements up to 80.000 measurement values (Windows® 98/ ME) and 100.000 measurement values (Windows® 2000/ XP/ Vista). The recorded series of measurements can be saved in a text file for the purpose of taking notes or for future usage. The transfer of the data is done by means of an optical interface, so that the PC or Laptop is not connected to the measurement signal.

The program BENNING PC-Win MM 11 "Download" allows to download the stored measurements of the storage and the data logger of the Digital-Multimeter.
Whereby 1.000 measurements values can be downloaded of the storage and 40.000 measurements values can be downloaded of the data logger.
The downloaded series of measurements can be saved in a text file for the purpose of taking notes or for future usage. The transfer of the data is done by means of an optical interface, so that the PC or Laptop is not connected to the measurement signal.

The following are supplied with the Software BENNING PC-Win MM 11
1.   One CD Rom with the Benning PC-Win MM 11
2.   One serial data cable with USB-2.0 compatible connector and optical adapter for
        BENNING MM 11
